

The NEW Irving & Bernice Singer Emergency Department at The Elliot is now open to patients!

On June 13, The Elliot welcomed patients to a newly expanded and renovated Emergency Department. This 22,000 sq. ft. expansion of the existing Emergency Department allows for a clinically superior patient experience with enhanced privacy, and improved operational flow for staff and patients. The new center is named the Irving and Bernice Singer Emergency Department to honor the Singer family for their devotion to the greater Manchester area and improving the lives of others.

The Elliot's ER is the busiest in New Hampshire and is the southern New Hampshire region's only ACS Level II Trauma center, currently averaging more than 55,000 patients per year. The new space will be able to handle more than 65,000 patients annually with the net gain of about a dozen exam rooms.

At the ribbon-cutting ceremony Robert Singer remarked that it was "one of the happiest and proudest moments of my life" giving back to the Greater Manchester community in such a meaningful way and seeing the space named after his parents.

"With this expansion, the Elliot Hospital is poised to meet the growing demands of our community, providing expedited, high-quality emergency care when it's needed most"
Mayor Joyce Craig

Some features of the expansion and renovation include:

- Twenty-eight new private exam rooms for a total of 32 private exam rooms, increasing privacy for a more comfortable, healing environment
- Three new state-of-the-art trauma rooms provide cutting-edge technology for superior trauma care and advance our ability to treat critical and life-threatening injuries
- An expanded rapid triage and treatment area to evaluate and quickly respond to patient needs with nine new dedicated bays and three new triage rooms
- Advanced infection control with state-of-the-art negative pressure rooms and HVAC technology. Modifications allow providers to better isolate infectious patients, increase ventilation and air filtration systems, and provide additional oxygen ports to care for an increased number of patients.

In addition to advanced medical and information technology, The Elliot continues to offer southern New Hampshire's only pediatric emergency department, and embedded psychiatrists and behavioral health specialists to treat the expanding volume of behavioral health emergencies.

Thank you to our Emergency Department Project Donors!
