Hi, my name is Elliot!

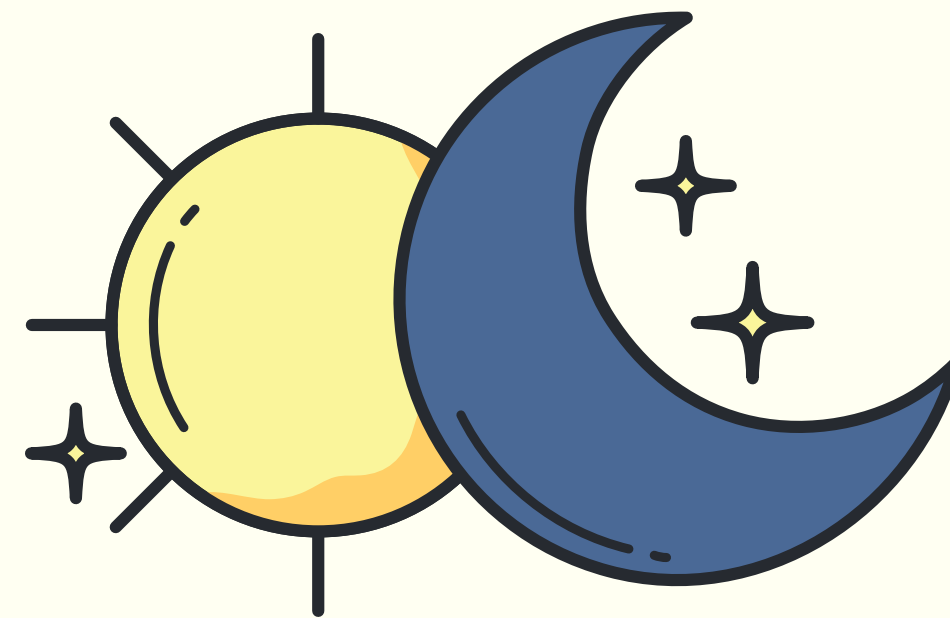

I came to the hospital to  
help my body feel better.  
Doctors and nurses are  
here to help!

I am in the Emergency Department. The Emergency Department is an area of the hospital where doctors and nurses are ready to help kids and grown-ups. The Emergency Department is open all day and all night.

The doctors say my body needs an X-Ray.

An X-Ray is a big camera that helps the doctors learn more about my body. An X-Ray takes pictures of the inside of my body.

They may bring the X-Ray to my room in the Emergency Department or I may go to the X-Ray room.

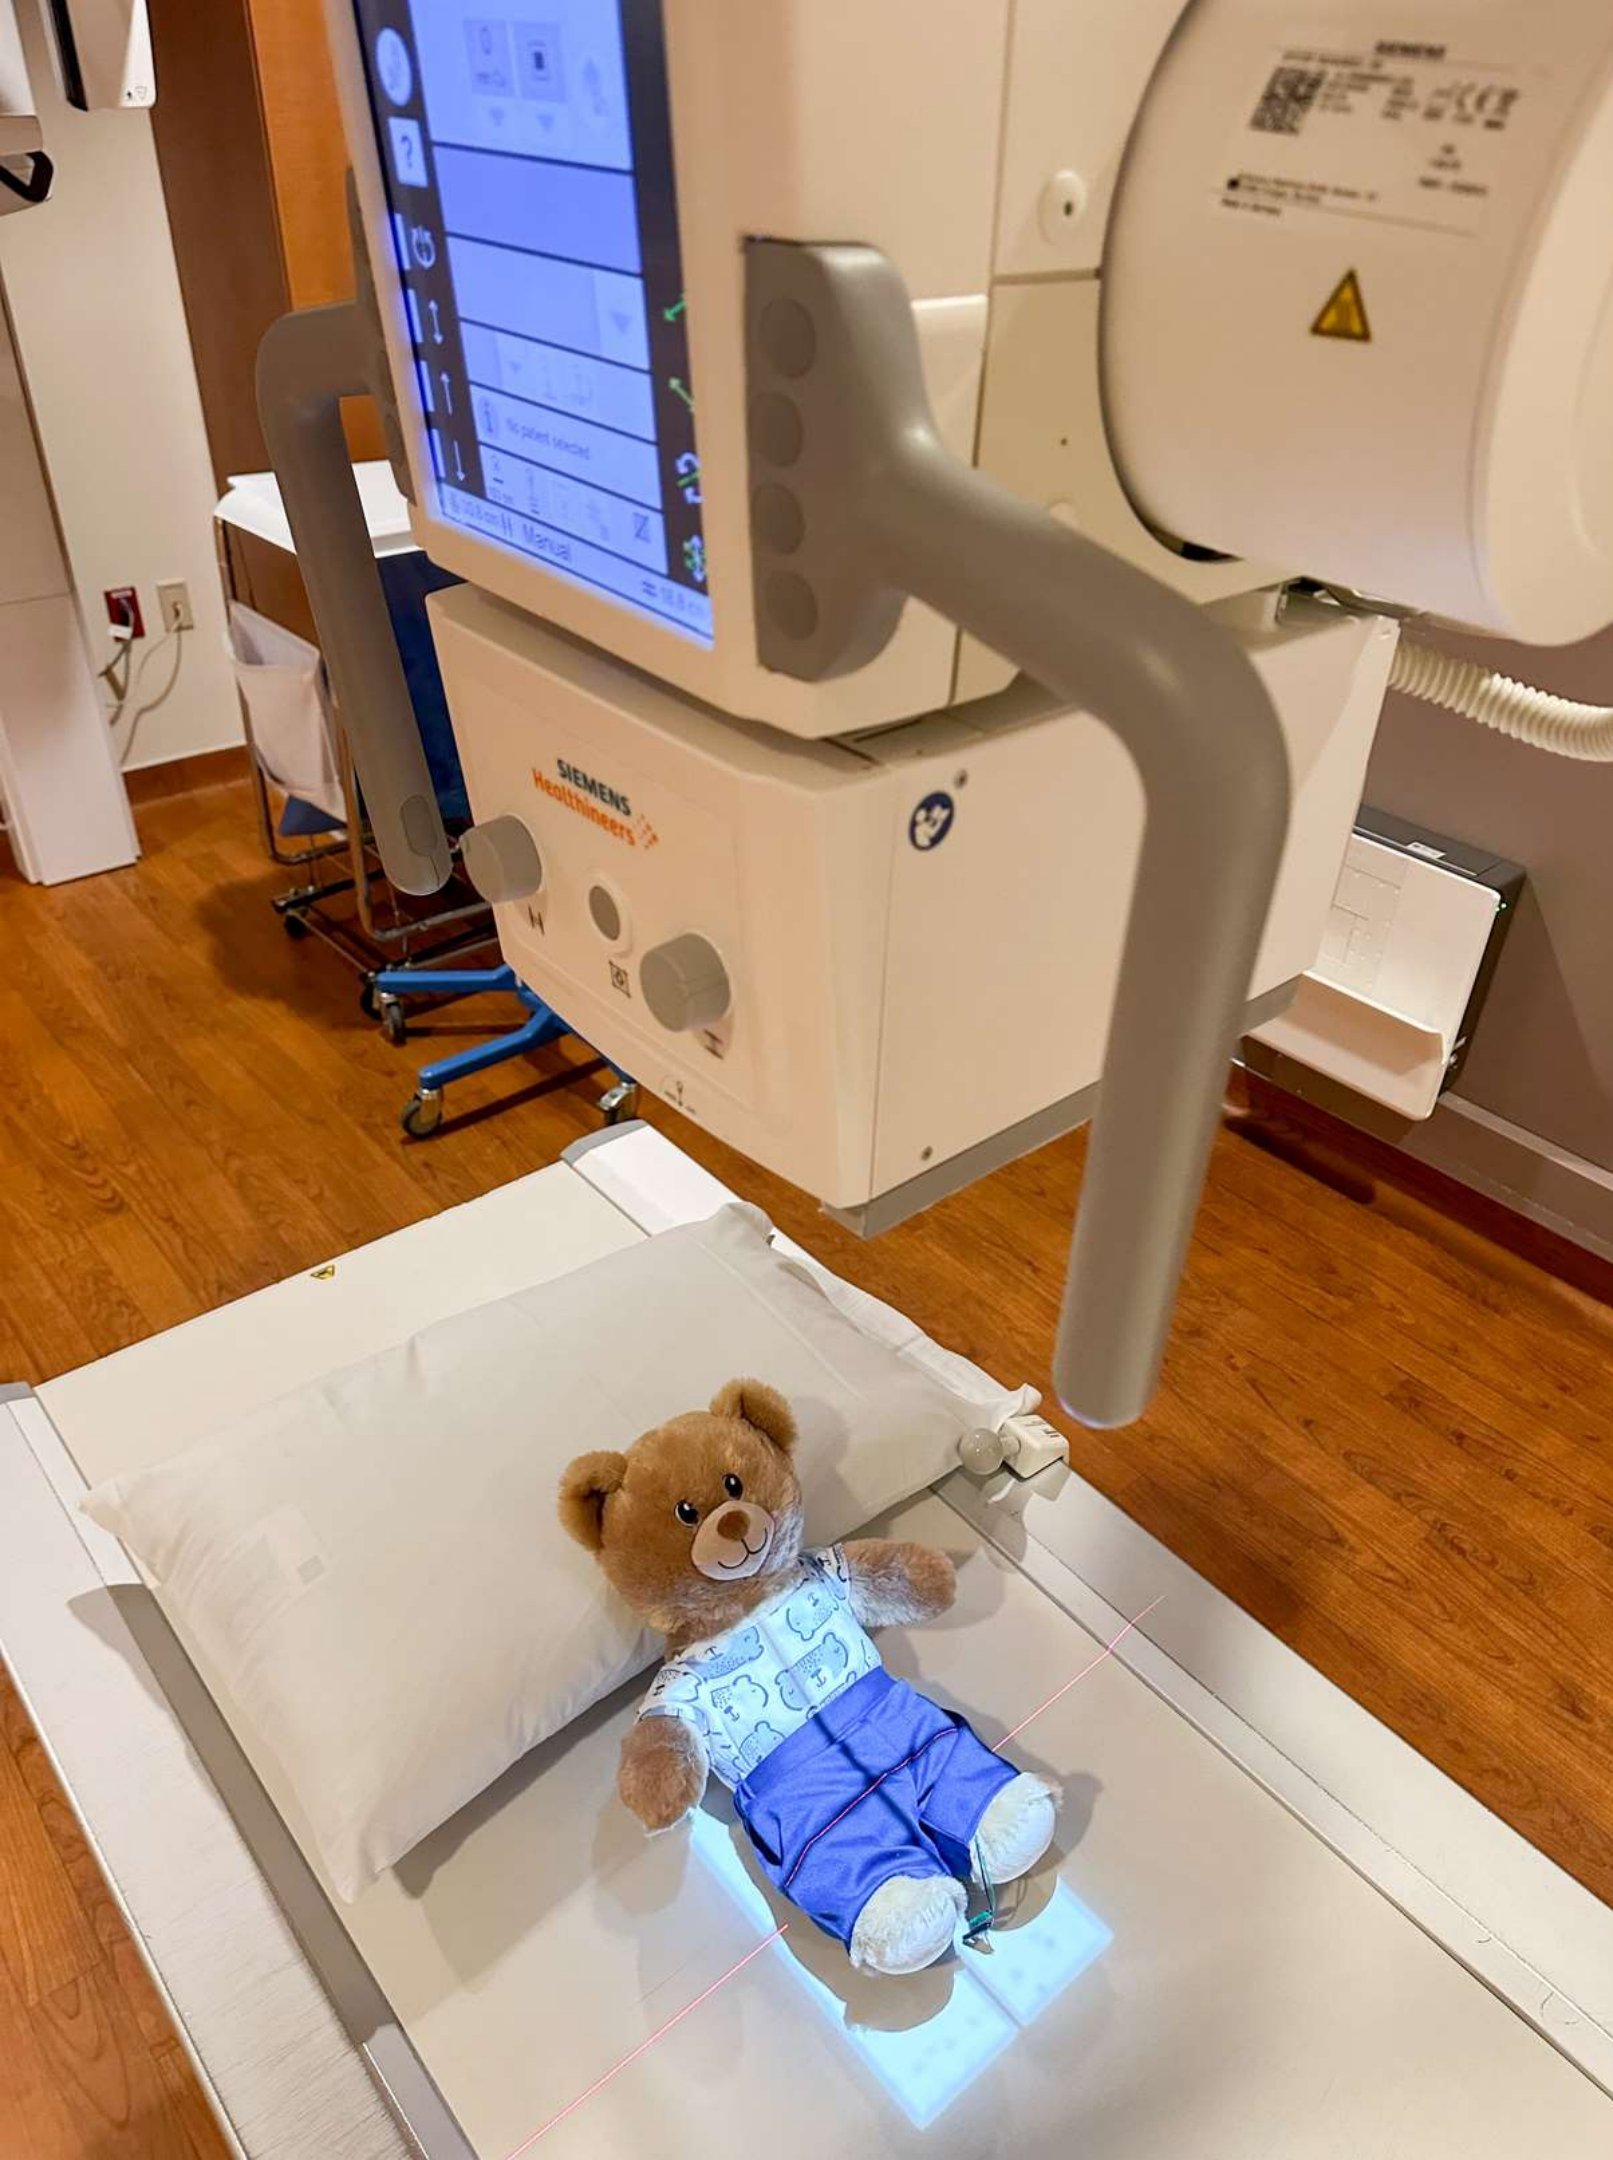

When it's time for my X-Ray, they will let me know where to lay down or stand.

I may need a board like this to help with pictures.

A grown-up can stand close to me and talk with me the entire time.

I will see the X-ray light turn on for the pictures, but I cannot feel the light. The light will be bright.

My only job is to hold still.

Sometimes they may need me to stand for my X-ray pictures.

After my X-Ray is all done I will stay in my room and wait.

When my X-Ray is all done, everyone will be so proud of me!

Please Note: Your child's plan of care may change from the steps listed, in order to meet your child's individual needs.
