Elliot Senior Health Primary Care providers offer a Geriatric Consultation Clinic for seniors. This service involves a medical examination by a Board Certified Geriatrician intended to help primary care physicians determine a course of treatment for older patients with multiple, complex health issues. Types of issues may include falls, depression, functional decline, infections, incontinence, malnutrition, pressure sores, drug interactions and side effects, and repeated emergency room visits.

- To make an appointment or for more information, call 663-7030.
- Appointments for the Geriatric Consultation Clinic require a physician’s referral.
